HIGHLIGHTS

Texas Forest Resource Harvest Trends 2002

2002 TIMBER REMOVAL

- ◆ Total timber removal increased 11.8 percent to 753.9 million cubic feet from 2001.
 - ◆ Pine removal was up 10.3 percent to 591.2 million cubic feet.
 - ◆ Hardwood removal rose 17.8 percent to 162.7 million cubic feet.
- ◆ Harvest of timber for industrial use in the production of wood products was 666.7 million cubic feet.
 - ◆ 537.0 million cubic feet of pine was harvested for industrial consumption.
 - ◆ 129.7 million cubic feet of hardwood was harvested for industrial consumption.
- ◆ The value of timber harvested increased from last year.
 - ◆ Stumpage value increased 4.2 percent to \$474.8 million.
 - ◆ Delivered value was up 8.4 percent to \$920.4 million.
- ◆ Harvest of sawlogs increased 0.2 percent from 2001 to 1,490.0 million board feet.
- ◆ Harvest of wood for veneer and structural panel production rose 7.3 percent to 190.8 million cubic feet from a year ago.
- ◆ Pulpwood harvest jumped 30.5 percent to 2.86 million cords.
- ◆ Texas exported more timber than imported in 2002. The total import from other states was 80.4 million cubic feet while the total export was 106.3 million cubic feet. The net export was 3.9 percent of the total roundwood production (666.7 million cubic feet) in Texas.

PRIMARY FOREST PRODUCTS

- ◆ Production of primary wood products included:
 - ◆ 1.65 billion board feet of lumber, an increase of 9.4 percent from last year.
 - ◆ 2.82 billion square feet of structural panel products, up 3.1 percent from 2001.
 - ◆ 2.73 million tons of paper and paperboard, up 1.8 percent from 2001.

GROWTH-REMOVAL RELATIONSHIP

- ◆ Removal of pine growing stock was 93.4 percent of the estimated growth.
- ◆ Removal of hardwood growing stock was 67.5 percent of the estimated growth.

Table 1. Total Industrial Timber Harvest Volume and Value by County in Texas, 2002

¹Other removals were calculated so that the annual Harvest Trends removal estimates were consistent with the Forest survey periodic estimates. Other removals for 1992 and 1993 were revised based on 1992 Forest Survey.

²1986 Forest Survey provides average annual growth and removals data for the years 1975 through 1985.

³1992 Forest Survey provides average annual growth and removals data for the years 1986 through 1991.

⁴ growth estimates were based on Forest Survey growth data plus annual reforestation, harvest information.
