87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

576 Texas A&M Forest Service

TEXAS LEADERSHIP

One of the primary roles of government is to help ensure the safety of its citizens. The Texas A&M Forest Service (TFS) is a proud member of an important team of agencies fulfilling this role through the state's dedicated support and direction. During the 86th Legislative session, supplemental appropriations of \$57.3 million were provided to cover the TFS emergency response costs for the 2017, 2018, and 2019 Fire Seasons, Hurricane Harvey and multiple floods, tornado and storm responses. When wildfires or other disasters occur -- Texas leaders, legislators and elected officials are there to support this agency, the firefighters and the citizens of Texas. THANK YOU!

TEXAS WILDFIRE PROTECTION PLAN – WILDFIRES & EMERGENCY RESPONSE

Disasters are measured in human impact – lives, homes and property. As one of the fastest growing states in the nation, Texas must lead in emergency preparedness and response.

TFS delivers wildfire response and protection through the Texas Wildfire Protection Plan (TWPP). First developed and tested over two decades ago, TWPP is a proven emergency response model utilizing continuous fire danger and risk analysis, mitigation, prevention and preparation, followed by a coordinated and rapid response. TWPP also recognizes the importance of building the local response capacity across the state, providing protection for communities during initial response and reducing fire size and losses.

Wildfire activity has continued to require extended mobilization of fire suppression resources into high-risk areas in Texas. Over the last five fiscal years, Texas has reported 45,927 wildfires for nearly 2 million acres with 21,247 homes saved. With over 90% of all Texas wildfires caused by human activity and 86% occurring within two miles of a community, the human impact is tremendous. TFS began tracking data on property saved from wildfires in FY2005. Through the end of FY2019, TFS and local fire departments have saved a total of 127,659 homes from wildfires. Total property value saved is \$16.4 billion.

With the emergency management skills developed in wildfire response, TFS is called upon by the Texas Division of Emergency Management (TDEM) to support state response efforts to a wide variety of disasters and emergency events such as floods, tornados, ice storms, hurricanes and COVID-19. TFS provides operational resources, such as saw crews and heavy equipment to clear roads of ice and storm debris, as well as incident management teams to support state and local response operations. Resource and mission tracking, logistics support, safety and organization are needed on any event. The same organizational structure used to manage large wildfires is used to support other types of disaster response. Coordinated through TDEM, TFS incident management teams are used to support local jurisdictions and state disaster district operations. Over the past 5 years, TFS has mobilized 1,298 personnel to non-wildfire disasters.

COVID-19

The COVID-19 global pandemic impacts every aspect of Texans' lives. As the state responds – implementing some of the most sweeping safety measures in modern history – TFS is there supporting state and local emergency response efforts. At the request of the state, TFS emergency response personnel have provided the following:

- Staffing of the TDEM/DSHS warehouse in San Antonio receiving, tracking and disbursing COVID-19 supplies and equipment (from the National Strategic Stockpile and other sources)
- Direct transport of medical PPE supplies to requesting Disaster Districts as needed to maintain medical supply operations
- Forklift operator training and certification to Texas Military Department personnel (National Guard) to support distribution operations at Austin, Dallas, Midland, Lubbock, El Paso and Tyler.

Administrator's Statement

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

576 Texas A&M Forest Service

- Assistance to other A&M System members providing contact tracing services for the Texas Department of State Health Services – helping to identify and inform Texas residents following confirmation or exposure to COVID-19.
- Planning, logistics and operational support to state Disaster Districts and local emergency operations centers across the state.
- Assistance to Dallas and McAllen with establishment and coordination of emergency field medical facilities and with coordination and movement of medical protective equipment from private sources into a state distribution network.

THE DEMAND FOR TFS FIREFIGHTERS AND EMERGENCY RESPONDERS – TIERED APPROACH – TESTED AND PROVEN

Texas uses a tiered approach to emergency response and wildfire suppression, relying on strong interagency partnerships and working relationships. Local fire departments and counties are the first responders, with state response being activated as fires or conditions exceed the local capacity to control. TFS is the lead state agency for wildfire response in Texas, with strategically placed resources across the state. TFS Predictive Services and Planning & Preparedness departments monitor wildfire occurrence and weather conditions statewide. As emergency response activity increases, resources from other state agencies, such as the Texas Department of Public Safety, the Texas Department of Transportation and Texas Military Department are mobilized through TDEM. As the capacity of state resources is exceeded, out-of-state resources are brought in to meet essential needs.

The demand for TFS firefighters and emergency management personnel continues to increase. Wildfires, ice storms, floods, tornados, hurricanes and COVID-19 – TFS is an integral part of Texas emergency response efforts – actively called on by the state for all types of disasters. Demand for TFS emergency responders has increased to the point where the agency often finds itself responding to multiple types of disasters at the same time. As an example, in April of 2020 TFS staffed a 25,958 acre wildfire in West Texas, operated the state COVID-19 supply warehouse in San Antonio, supported state Disaster Districts COVID-19 operations across the state, and provided storm cleanup, damage assessment and mapping services in Polk, Jasper and Newton counties following a tornado.

Volunteer fire departments are the primary responders covering 76% of the State of Texas – and the number of volunteer firefighters is dropping. Over the past two decades, Texas has seen a 21% drop in the number of volunteer firefighters in the state – making the availability of TFS firefighters and other response resources even more critical as the size, scope and impact of disasters continues to increase.

Over the last fourteen years, TFS has been working to increase the agency's capabilities and make better statewide use of local fire and emergency management resources. Utilizing local-level Texas emergency responders and equipment from areas of the state unaffected by current disasters, TDEM and TFS are creating the surge capacity to meet essential emergency response needs with rapidly responding Texas-based resources. The Texas Intrastate Fire Mutual Aid System (TIFMAS) and the Regional Incident Management Team (RIMT) programs are highly successful examples of Texans helping Texans and are national models.

LOCAL RESPONDERS

Local fire departments are the first line of defense against wildfires across the state. Currently there are 1,847 fire departments in Texas - 1,346 of these are fully volunteer. Of the 55,000 local firefighters in the state, nearly half are volunteers--dedicated men and women who serve their state and communities, while holding other jobs. Many departments operate with aged, battle-worn equipment, very limited funding and decreasing numbers of volunteers.

TFS administers a number of fire department assistance programs that set national standards for providing training, equipment and grants to help build their capacity to respond. The largest and most impactful of these programs is the Rural VFD Assistance Program. This program was created in 2001 by the 77th Texas Legislature – providing pass-through grants to Texas VFD's for crucial equipment and training – and is funded through a special assessment to the insurance industry (Fund 5064). From inception (2002) through the end of FY2019, 1,953 grants for fire trucks, 9,592 grants for equipment and PPE (structural and wildland protective equipment) and

576 Texas A&M Forest Service

86,921 grants for training tuitions have been awarded to volunteer fire departments across the state. The continuing needs are great, as evidenced by the \$230.8 million in unfunded requests. The Texas Legislature currently provides funding for grants under this program at \$16.1 million per fiscal year (after the 5% reduction).

REGIONAL RESPONDERS

Texas Intrastate Fire Mutual Aid System (TIFMAS):

In 2007 the 80th Texas Legislature passed SB 11, establishing the framework for mutual aid response in Texas. Operating under this legislative direction, TDEM, TFS and the Texas Fire Chief's Association developed TIFMAS. Maintained by TFS, the program includes training, qualification and mobilization systems to make statewide use of local resources. The program was first used during Hurricane Ike and has since been used in response to the Presidio flooding, Hurricane Alex, the plant explosion at West, 2016 and 2017 flooding, Hurricane Harvey, and wildfires in 2009, 2011, 2012, 2015, 2016, 2017, 2018, 2019 and 2020. Since 2008, TIFMAS mobilizations have provided 1,194 fire engines, 45 boats and 4,726 firefighters during state-led emergency response to disasters. By mobilizing local resources from unaffected areas, TIFMAS fills a critical surge capacity need that cannot be met using out-of-state resources. A side benefit is the "pay-it-forward" attitude developed by recipients of TIFMAS assistance in their enthusiastic willingness to deploy to other areas of Texas when called.

The 81st Texas Legislature enacted legislation allowing TFS to provide grants for fire trucks, protective gear and training to municipal fire departments who agree to mobilize under TIFMAS to support statewide and regional emergency response. Developed with support from the Texas Fire Chiefs Association, State Firemen's and Fire Marshals' Association and the Texas Association of State Firefighters, these grants directly benefit both local and statewide response capabilities. Since the inception of the TIFMAS grants, TFS has awarded \$11 million in grants to fire departments, including 46 engines and 8,416 training tuitions.

Regional Incident Management Teams (RIMTs):

Initiated in 2006 by Governor Rick Perry's executive order, the Texas RIMT program is built upon the neighbor-helping-neighbor model. The RIMT program maintains a network of trained incident management teams and personnel from local and municipal entities within Texas to supplement state and regional emergency response operations. The program is maintained by TFS using homeland security funds from TDEM. The Texas RIMT program currently has 18 teams available for mobilization. To date, RIMT personnel have helped fill critical response needs on 27 all-hazard incidents (hurricanes, floods, tornados, ice storms, Hurricane Harvey, COVID-19, etc.) in addition to supporting Texas wildfire operations in 2008, 2009, 2010, 2011, 2012, 2015, 2017, 2018, 2019 and 2020.

Through TIFMAS and RIMT, local responders across the state stand ready to assist communities in times of need. But more is needed.

TOUGH TIMES FOR TEXAS

TFS implemented the required 5% budget reduction plan for the 2020-21 biennium. The plan involved a multi-strategy approach comprised of delayed filling of positions, reductions in equipment and training grants to fire departments, and delayed replacement of agency equipment and vehicles. Each of these reduction strategies will negatively impact the agency's ability to respond to emergencies – wildfire, all hazard, or COVID related.

TFS recognizes the difficult financial situation facing the State of Texas and understands the need for the legislature to consider strategies for cutting costs. Due to the agency's critical role in public safety in the areas of wildfire and emergency response and the fact that funding for these services comes from sources with somewhat unique limitations, TFS requests the same exemptions from reductions be considered as was provided during the 82nd Legislative session. Specifically, the Insurance Companies Maintenance Tax and Insurance Department Fees and the Volunteer Fire Department Assistance Fund should be exempted because they are self-leveling funds and a reduction in their appropriation will be offset by a corresponding reduction in revenue. These reductions will do nothing to help with the state's budget shortfall while unnecessarily reducing the amount of firefighter training and equipment provided to fire departments and reducing the capacity of the Texas Wildfire

Administrator's Statement

9/18/2020 1:11:09PM

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

576 Texas A&M Forest Service

Protection Plan. Additionally, during this time of emergency response on multiple fronts, TWPP (all funding sources) should be exempted due to its public safety role.

SUPPLEMENTAL APPROPRIATIONS REQUEST – WILDFIRE, COVID-19 AND EMERGENCY RESPONSE BILLS

Drought, fire weather and large wildfires continue to impact Texas – with active fires seasons in 2019 and 2020 requiring the mobilization of ground and aviation resources to assist with fire suppression. Thanks to the foresight of the Texas Legislature, TFS has been able to maintain an active ground response with minimal reliance on costly out-of-state resources. The mobilization and use of firefighting aircraft however, is not currently funded within the normal state appropriations to the agency.

In addition to wildfire suppression, TFS responded to floods, hurricanes, tornados, winter storms and COVID-19 as requested by the state through the TDEM.

While final billing from the federal agencies and reimbursements from FEMA have not yet been received, we estimate \$46.9 million will be needed to cover the bills incurred through FY2020.

PUBLIC HEALTH INITIATIVE

Promotion of Healthy Trees, Healthy Lives Initiative

Healthy Trees, Healthy Lives is an initiative that integrates trees and forests with public health. The program emphasizes and enhances the proven positive connection between trees and human health, promoting equal access to the therapeutic benefits of tree canopy and improving forest management to augment public health, reduce healthcare costs and create happier, healthier communities. As seen during the COVID-19 pandemic, access to trees and nature has positive effects on physical health and mental wellbeing. As the 87th Texas Legislature considers a wide range of actions related to public health and COVID-19, TFS encourages and stands ready to assist with the incorporation of trees and nature into Texas public health initiatives.

EXCEPTIONAL ITEMS

Restore 5% Reduction for Self-leveling Funds:

TFS implemented the required 5% budget reductions for the 2020-21 biennium. Part of the reductions were to Fund 8042 – GR – Insurance Companies Maintenance Tax and Insurance Department Fees and Fund 5064 – GR Dedicated – Volunteer Fire Department Assistance Account No. 5064, which are self-leveling funds (Insurance Code, Chapters 252-271 and 2007). A reduction in appropriations from these funds will result in a corresponding reduction in revenues, which does nothing to help with state's budget shortfall while unnecessarily reducing the amount of firefighter training and equipment provided to fire departments and ultimately reducing the capacity of the Texas Wildfire Protection Plan. TFS requests restoration of these reductions, which will result in no additional cost to the state.

Increased TFS Capacity – Wildfire and Emergency Response:

Fund 8042 - \$20,000,000

TFS recognizes the financial challenges facing Texas, however the demands for TFS wildfire and other emergency response services continue to increase. To meet these demands, TFS requests an additional \$10 million/year for the 2022-2023 Biennium to support 50 new fire/emergency response positions, suppression equipment and aviation support costs. Volunteer fire departments are the primary local emergency responders for most of Texas. With the 21% drop in the number of volunteer firefighters during the past 20 years, the demand for TFS firefighters and national wildfire aviation resources continues to increase. Also, TFS' all-hazard role can stretch the agency's limited resources, especially when responding to multiple events simultaneously. Additional emergency response personnel and equipment are needed to meet these increasing demands.

Administrator's Statement

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

576 Texas A&M Forest Service

OTHER FUNDING ISSUES

Immediate Fire Suppression Costs

Supplemental appropriations for TFS wildfire costs over the last two sessions has totaled \$62.4 million. Some of these expenses can be carried to the next legislative session for payment, but an increasing number cannot. A number of fire suppression and support resources, such as the retardant dropped from aircraft, are only available on national contract. The cost of contract resources (except for aircraft) must be paid immediately and directly by TFS. This has created significant cash-flow issues for the agency during increased fire activity. TFS requests access to existing state emergency funds or establishment of an emergency contingency fund under the control of the A&M System or State Comptroller. Emergency contingency funds would also support TFS' growing role in the full spectrum of state disasters.

Infrastructure Support Funding Outside of the Brazos Valley

The four agriculture A&M System Agencies request that the funding for out-of-Brazos County infrastructure not be treated as a formula. The agencies request that out-of-Brazos County infrastructure be funded at the 2020-21 budgeted/expended level in each agency's base. Both the facilities and the costs associated with operating the facilities are fixed at each of the agencies and do not benefit by being forced into a formula. Unlike in-Brazos County infrastructure, types of square feet vary considerably out in the state among the four agencies making the application of a formula impracticable. There is no cost to the state to make this adjustment.

BACKGROUND CHECKS

TFS has designated all budgeted, seasonal and student worker positions as security sensitive. Prior to extending a final offer of employment, the agency obtains criminal history information. Adverse information is reviewed by appropriate agency management prior to obtaining final approval for hiring.

THE TEXAS A&M UNIVERSITY SYSTEM FUNDING INITIATIVES

We recognize the difficult financial situation and tough budget decisions that will face the 87th Legislature and will work collaboratively with state leaders to find the support needed for the education, research, and service we provide. A robust higher education sector is key to long term economic growth and resiliency, but increased costs, revenue losses, and budget reductions due to the pandemic have Texas' higher education sector stressed and stretched. With a direct presence in all 254 Texas counties, Texas A&M System Agencies offer research, training, and service to the state's citizens, to improve the social, economic, educational, and health status of Texans. They also play a critical, core role in supporting statewide disaster preparedness and response, from natural disasters such as wildfires and hurricanes to the coronavirus pandemic.

Despite getting no relief from the state's five percent 2020-21 biennial reduction like other agencies that are working on COVID response, our A&M Agencies—in particular the Texas A&M Forest Service, Texas A&M Engineering Extension Service, Texas A&M AgriLife Extension, and Texas A&M Veterinary Medical Diagnostic Laboratory—continue to respond to the pandemic daily. On any given day, we have over 1200 employees, plus the employees of TDEM, serving Texas and Texans through their pandemic response work. We request that all the response efforts at the A&M Agencies be recognized as part of the state's emergency response system and be exempted from any continued or future budget reductions. We request continued investment in higher education and the A&M System Agencies to ensure we maintain our ability to serve the people of Texas. Key agency funding issues are detailed below:

Base Funding

Maintaining equitable, reliable, and predictable funding for higher education is critical, including for the A&M System Agencies. Over the last decade, and particularly in response to Hurricane Harvey, the A&M System Agencies have been tapped to help meet Texas' emergency preparedness and response to hurricanes, tornados, flooding, wildfires, and other events, while continuing to fulfill their research and service missions to improve the lives of Texans. Now our state and country are facing the COVID-19 pandemic, and with the addition of the Texas Division of Emergency Management (TDEM) as the eighth agency in the A&M System, the state's disaster

Administrator's Statement

9/18/2020 1:11:09PM

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

576 Texas A&M Forest Service

response is dependent on all of these service agencies.

Base funding is provided to institutions of higher education by the State through both formula and non-formula support. Formula funding for the academic institutions supports the core instructional, operational, and infrastructure costs at the institutions. As the A&M System agencies, like other sectors of higher education, adapt to the financial hardships of COVID-19, base funding provides critical support for the programs and services our agencies provide to the state. While our agencies do not have an operations formula, they need base funding support similar to the support provided by the operational formulas for the academic and health related institutions. This is important not only to provide stable support for agency core missions in a growing state but also, given the critical public safety role of the agencies, in responding to ongoing state emergencies and the coronavirus pandemic.

Restoration of 5% Reductions

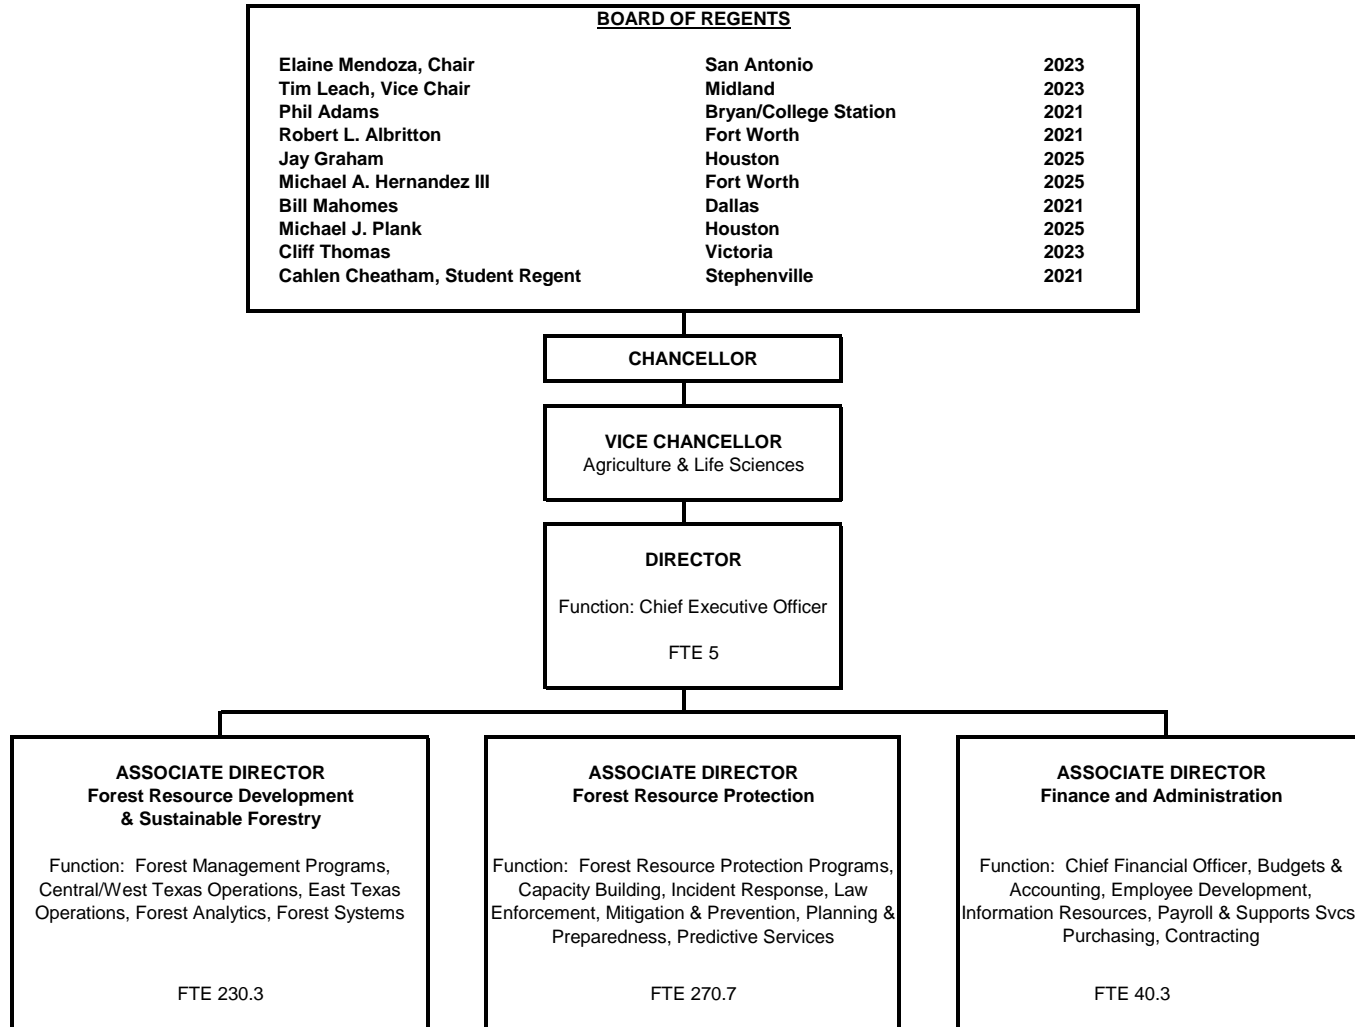

Across the A&M System, the reductions total \$84.6 million. These reductions hurt. Our agencies had to cut into the services provided to communities and the state and stressed our resources and employees as we actively responded to hurricanes, wildfires, tornados as well as our significant efforts on behalf of the statewide COVID response. Continuing these reductions into the 2022-23 biennium continue to harm the mission of our agencies and will perpetuate the impacts to Texans.

Higher Education Group Health Insurance

We request funding to cover increases in covered enrollments in our insurance program and in health care costs beyond our control. We also request restoration of the gap in funding for our employees compared to state employees in the ERS group plan.

TEXAS A&M FOREST SERVICE

ORGANIZATIONAL CHART

CERTIFICATE

Agency Name TEXAS A&M FOREST SERVICE

This is to certify that the information contained in the agency Legislative Appropriations Request filed with the Legislative Budget Board (LBB) and the Governor's Office Budget Division (Governor's Office) is accurate to the best of my knowledge and that the electronic submission to the LBB via the Automated Budget and Evaluation System of Texas (ABEST) and the PDF file submitted via the LBB Document Submission application are identical.

Additionally, should it become likely at any time that unexpended balances will accrue for any account, the LBB and the Governor's Office will be notified in writing in accordance with Article IX, Section 7.01 (2020-21 GAA).

STRATEGY DESCRIPTION AND JUSTIFICATION:

Very high demand by private forest landowners for professional forestry guidance and forestry services causes TFS to place high priority emphasis on this strategy . This is accomplished by a strong technical assistance program where professional foresters provide timely, science-based information to Texas landowners. Major efforts are also directed to attracting new forest industry to Texas through resource assessments, evaluation of new products and markets, and use of alternative species.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Texas' demand for forest resources continues to increase. We currently supply less than half of our own wood needs and must rely on imports from other states and Canada. TFS will lead a coordinated effort, joining all aspects of the forestry community, to meet these challenges and prepare Texas forest landowners for the future. Fragmentation of the forest land base, access to markets, and increased demands are but a few factors emphasizing the critical need for leadership, technical assistance and accurate resource information if non-industrial private owners are to meet the future forest needs of Texas.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Urban and community forestry programs have been expanded into every major population center of Texas because of tremendous public demand and the availability of federal funds for this purpose. In addition, across the non-forested portion of the state, numerous farmers, ranchers, and other owners benefit from professional land management assistance, continuing education and windbreak tree seedlings. All of these forestry practices enhance air quality, wildlife habitat and overall quality of living.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Environmental concerns are dominant among most Texans, and it is imperative that TFS take a positive leadership role in dealing with stewardship of urban and other tree resources. Eighty-four percent of Texans live on three percent of the land. As our population continues to grow beyond 29 million, TFS must take an increased leadership role in building community capacity within these urban/wildland interface areas to sustain the environmental quality and protect the lives and property of our urban citizens.

GOAL: 1 Develop Forest/Tree Resources to Sustain Life, Environment & Property
 OBJECTIVE: 1 Increase Volume, Utilization & Awareness of Forest and Tree Resources Service Categories:
 STRATEGY: 3 Provide Detection/Notification/Control of Forest/Tree Insect & Disease Service: 37 Income: A.2 Age: B.3

CODE	DESCRIPTION	Exp 2019	Est 2020	Bud 2021	BL 2022	BL 2023
------	-------------	----------	----------	----------	---------	---------

TFS Forest Health Program provides statewide leadership in the identification, education and suppression for a variety of pest known to affect the state’s forests, woodlands and trees. TFS staff are integral in identifying known pest outbreaks, identifying threats and developing strategies for mitigating those threats. Part of any mitigation strategy includes an educational and outreach component through which TFS staff educate Texans of known pest outbreaks, the current threat level and how Texans can assist in combating the establishment and spread of pests which pose a severe threat to the Texas economy and natural resources.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Native bark beetle activity is cyclical but with continuing weather extremes increased activity can be expected. Invasive insects such as emerald ash borer and Asian longhorn beetle among others have the potential to negatively affect Texas trees, forests and woodlands. Diseases such as oak wilt continue to threaten trees and woodlands throughout Central Texas and the cities of Austin, San Antonio, Fort Worth, and others. State funds are needed to reduce the impact of these pests.

STRATEGY DESCRIPTION AND JUSTIFICATION:

TFS delivers wildfire response and protection through the Texas Wildfire Protection Plan (TWPP). TFS first launched TWPP as a pilot program more than two decades ago and it is now a national model for state wildfire protection. TWPP is a tested and proven emergency response model emphasizing ongoing analysis, mitigation, prevention and preparation, followed by a coordinated and rapid response. TWPP also recognizes the importance of building the local response capacity across the state, providing more protection for communities during initial response and reducing fire size and losses. TFS provides leadership and wildfire protection on 156 million acres across Texas. In addition, TFS actively cooperates with the Texas Division of Emergency Management agency (TDEM) to respond to any emergency when needed.

------	-------------	----------	----------	----------	---------	---------

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Many changes in recent years impact the wildfire prevention and suppression programs of TFS. Below are listed only a few for emphasis:

1. Population/Demographics: Currently at 29 million and growing rapidly, every part of the state is impacted by the sheer number of people. With over 90% of wildfires started by man, increased population means increased dangers of wildfire.
2. Wildland Urban Interface: Where the country meets the city, there is a significant increase in the risk of disaster due to wildfire. A short drive in the hills west of Austin graphically demonstrates this danger. Spatial analysis of Texas wildfires show that 86% of wildfires occur within 2 miles of a community.
3. Expanding Demands: Wildfires, hurricanes, floods and occurrences make Texas one of the three leading natural disaster states in the nation. This places a significant additional burden on Texas fire departments and TFS for all-hazard incident response. New, innovative approaches must be used to meet expanding demands and to protect the citizens we serve.

FULL TIME EQUIVALENT POSITIONS:

STRATEGY DESCRIPTION AND JUSTIFICATION:

TFS provides the only major source of support and assistance to its valuable volunteer fire department (VFD) partners. This support and assistance includes training, equipment, coordination and cost-sharing for needed equipment and supplies. The Rural VFD Assistance Program is the largest VFD grants program administered by TFS. It is funded through a special assessment to the insurance industry and provides funding for equipment and training. The Rural VFD Insurance Program is a much smaller program and is also administered by TFS. It is funded through a tax on fireworks sales and provides funding for workers comp and life insurance.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Local fire departments are the first line of defense against wildfires across the state. Currently there are 1,847 fire departments in Texas - 1,346 of these are fully volunteer. Of the 55,000 local firefighters in the state, nearly half are volunteers; dedicated men and women who serve their state and communities, but have other jobs. Many departments operate with aged, battle-worn equipment and very limited funding.

CODE	DESCRIPTION	Exp 2019	Est 2020	Bud 2021	BL 2022	BL 2023
------	-------------	----------	----------	----------	---------	---------

STRATEGY DESCRIPTION AND JUSTIFICATION:

In 2007 the 80th Texas Legislature passed SB 11, establishing the framework for mutual aid response in Texas. Operating under this legislative direction, TDEM, TFS, and the Texas Fire Chief’s Association developed Texas Intrastate Fire Mutual Aid System (TIFMAS). Maintained by TFS, the program includes training, qualification and mobilization systems to make statewide use of local resources. The program was first used during Hurricane Ike and has been used in response to the Presidio flooding, Hurricane Alex, the plant explosion at West, 2016 and 2017 flooding, Hurricane Harvey, and wildfires in 2009, 2011, 2012, 2015, 2016, 2017, 2018, 2019 and 2020. Since 2008, TIFMAS mobilizations have provided 1,194 fire engines, 45 boats and 4,726 firefighters during state-led emergency response to disasters. By mobilizing local resources from unaffected areas, TIFMAS fills a critical surge capacity need that cannot be met using out-of-state resources.

The 81st Texas Legislature enacted legislation allowing TFS to provide grants for fire trucks, protective gear and training to municipal fire departments who agree to mobilize under TIFMAS to support statewide and regional emergency response. Developed with support from the Texas Fire Chiefs Association, State Firemen’s and Fire Marshals’ Association and the Texas Association of State Firefighters, these grants directly benefit both local and statewide response capabilities. Since the inception of the TIFMAS grants, TFS has awarded \$11 million in grants to fire departments, including 46 engines and 8,416 training tuitions.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

TIFMAS Mobilizations are supported in Government Code Section 418.110 and Sub-Chapter E-1 and the State Emergency Management Plan. This program directly benefits both local and statewide response capabilities, reducing the reliance on out-of-state resources during periods of high fire danger.

Program Prioritization: Indicate the methodology or approach taken by the agency, court, or institution to determine the ranking of each program by priority.

TFS assigned program priority based upon the combined impact to TFS, its cooperators and the State of Texas. However, given the agency's size, the programs are very inter-connected and changes to one will impact others.

8042	Insurance Maint Tax Fees	1,078,459	1,078,459
TOTAL, METHOD OF FINANCING		\$2,231,036	\$2,231,037

DESCRIPTION / JUSTIFICATION:

TFS implemented the required 5% budget reductions for the 2020-21 biennium. Part of the reductions were to Fund 8042 – GR – Insurance Companies Maintenance Tax and Insurance Department Fees and Fund 5064 – GR Dedicated – Volunteer Fire Department Assistance Account No. 5064, which are self-leveling funds (Insurance Code, Chapters 252-271 and 2007). A reduction in appropriations from these funds will result in a corresponding reduction in revenues, which does nothing to help with state’s budget shortfall while unnecessarily reducing the amount of firefighter training and equipment provided to fire departments and ultimately reducing the capacity of the Texas Wildfire Protection Plan. TFS requests restoration of these reductions, which will result in no additional cost to the state.

EXTERNAL/INTERNAL FACTORS:

TFS delivers wildfire protection – utilizing continuous fire risk analysis, mitigation, prevention and preparation – followed by a coordinated and rapid response. TFS firefighters responded to 3,812 wildfires on 1.4 million acres during the last 5 years and are currently engaged in active wildfire operations over most of the state. The agency is also called upon by TDEM to support state response efforts to a wide variety of disasters and emergency events such as floods, tornados, ice storms and hurricanes. This spring, while responding to wildfires in west Texas and tornados in East Texas, TFS had over 120 personnel committed to COVID-19 response, providing planning and logistical support assisting TDEM, DSHS, and local jurisdictions. Assistance activities include: Incident Action Plan development, personal protective equipment hauling, logistical support for shipping and receiving materials at San Antonio TDEM/DSHS warehouse (distributing over 90 million items as of 5/31), COVID-19 contact tracing support (50 employees assisting DSHS).

FULL-TIME EQUIVALENT POSITIONS (FTE):

25.00	50.00
-------	-------

DESCRIPTION / JUSTIFICATION:

TFS requests an additional \$10 million per year in funding for TWPP – TFS Operations. Funding will be used to achieve four critical objectives to strengthen and revitalize the state’s firefighting and emergency response capabilities:

1. Add a total of 50 fire/emergency response positions, 25 in the first year, to maintain effective statewide wildfire/all-hazard response and mitigation capacity. The agency continues to be called upon to respond to multiple emergencies at once – as recently experienced during COVID-19 response. While, volunteer fire departments are integral to response, the state needs to increase its ability to respond in areas with declining number of volunteer firefighters (down by 21 percent since 2002). As a result of this decline, TFS wildfire response activity across most of the state has more than doubled over the last 8 years.
2. Fund the federal contract costs (such as aviation support) that can no longer be deferred under federal agreement.
3. Adjust pay scales to be more competitive, improve retention and strengthen wildfire/all-hazard response capacity. TFS hires and trains entry-level staff for most positions

Agency code: 576

Agency name:
Texas A&M Forest Service

CODE	DESCRIPTION	Excp 2022	Excp 2023
------	-------------	-----------	-----------

and loses many of them to better paying jobs (truck driving, heavy equipment operation, etc.). This significantly affects the agency's and state's wildfire/all-hazard response capacity.

4. Add/replace suppression equipment. Expenditures for equipment will be higher in the first year as personnel are hired, and will be less in the second year when staff positions are filled.

Without this funding, TFS will have increased operating costs at existing funding levels – resulting in reduced wildfire response capacity and capability of the state. This will result in increased use of out-of-state wildfire suppression resources (as available) and increased supplemental appropriation requests to cover the costs.

EXTERNAL/INTERNAL FACTORS:

There has been a 21 percent decline in the number of volunteer firefighters and a 36 percent increase in the number of citizens in Texas since 2002.

From FY2015 thru FY2019, TFS responded to 3,812 wildfires for 1.4 million acres burned and 10,347 homes saved.

Total impact of TWPP for FY2005-FY2019 is \$16.4 Billion in property values saved.

Federal-source aircraft, particularly airtankers that drop fire retardant, are essential resources on large wildfires. Some of these expenses (USFS costs) can be carried to the next legislative session for payment, but an increasing number cannot. Aircraft support costs, that must be paid immediately, were not factored into previous TWPP funding requests and have significantly impacted TFS operating funds and equipment replacement.

TFS is statutorily responsible for wildfire suppression in Texas and is best positioned to respond to wildfires that exceed local capabilities. TFS is also called upon by TDEM to support state response efforts to a wide variety of disasters such as floods, tornados, ice storms and hurricanes. Over the past five years, TFS has mobilized 1,298 agency personnel to non-wildfire disasters. Most recently, TFS emergency response personnel supported Texas COVID-19 response by providing planning and logistics personnel to the State Operations Center, multiple disaster districts, San Antonio TDEM/DSHS warehouse, and the contract tracing effort.

DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :

Out-year costs include (1) Salaries, wages and operating, (2) equipment and vehicle replacements, and (3) federal contract costs (such as aviation support).

B. Assessment of Fiscal Year - Efforts to Meet HUB Procurement Goals

Attainment:

The agency attained or exceeded two of five, or 40% of the applicable agency HUB procurement goals in FY 2018.

The agency attained or exceeded two of five, or 40% of the applicable agency HUB procurement goals in FY 2019.

Applicability:

The "Heavy Construction" category was not applicable to agency operations in fiscal year 2018, since the agency did not have any purchases related to that category.

Factors Affecting Attainment:

As an Emergency Response Agency, a substantial amount of purchases are for highly specialized equipment and services required to support agency operations in wildfire suppression/prevention, forest development, and other forestry related operations. TFS continues to experience a challenge in locating the HUB vendors that can actually bid on and supply these specialized items. Additionally, emergency purchases that occur in remote areas of the state, continue to create situations where (a) the available HUB vendor base is very limited or non-existent, or (b) there is inadequate time to locate HUBs.

"Good-Faith" Efforts:

FY 2018-19 the agency made the following good faith efforts to comply with statewide HUB procurement goals per 1 TAC Section 111.13(c): 1) Insured that all delegated purchases were in accordance with adopted CPA rules and procedures in regard to HUB programs; 2) Identified potential HUB subcontracting opportunities that require subcontracting plans for contracts of \$100,000 or more and, where such opportunities existed, provided potential bidders with referenced list of certified HUBs for subcontracting; 3) Participated in TAMUS HUB Performance Improvement Plan activities; 4) Co-sponsored and participated in multiple System and Statewide HUB Economic Forums, including: ACCESS 2018 in Arlington on May 7th and 8th, 2018 and ACCESS 2019 in Arlington on May 6th and 7th, 2019; SFA vendor show in Nacogdoches held on October 18th, 2019; Statewide HUB Expo held in Beaumont on March 5th, 2019; HMSDC vendor Expo in Houston held on

SUMMARY OF SPECIAL CONCERNS/ISSUES

Assumptions and Methodology:

Most appropriated funds come to TFS through the USDA Forest Service as cooperative on-going base program support on a 50-50 matching basis.

USE OF HOMELAND SECURITY FUNDS

All Homeland Security expenditures are contained within strategies 2-1-1 TWPP - TFS Operations, 2-1-2 TWPP - VFD Grants, 2-1-3 TWPP - TIFMAS Grants, and 2-1-4 Wildfire Emergency Funds. These funds are used to provide statewide leadership for an effective forest and rural land wildfire prevention, detection, and suppression program and emergency response management.

USE OF HOMELAND SECURITY FUNDS

The COVID-19 global pandemic has impacted every aspect of Texans’ lives. As the state responds – implementing some of the most sweeping safety measures in modern history – TFS is there supporting state and local emergency response efforts. At the request of the state, TFS emergency response personnel have provided the following:

- Staffing of the TDEM/DSHS warehouse in San Antonio receiving, tracking and disbursing COVID-19 supplies and equipment (from the National Strategic Stockpile and other sources)
- Direct transport of medical PPE supplies to requesting Disaster Districts as needed to maintain medical supply operations
- Forklift operator training and certification to Texas Military Department personnel (National Guard) to support distribution operations at Austin, Dallas, Midland, Lubbock, El Paso and Tyler.
- Assistance to other A&M System members providing contact tracing services for the Texas Department of State Health Services – helping to identify and inform Texas residents following confirmation or exposure to COVID-19.
- Planning, logistics and operational support to state Disaster Districts and local emergency operations centers across the state.
- Assistance to Dallas and McAllen with establishment and coordination of emergency field medical facilities and with coordination and movement of medical protective equipment from private sources into a state distribution network.

A total of 177 TFS employees logged 47,367.25 hours of response time on COVID-19 operations. Over the 6-month period, that calculates to approximately 45.54 FTEs.
