Okay, sportsmen. Hunting season is less than a month away, and it’s still dry out there around those dove fields. Everyone can help prevent human-caused wildfires in the great outdoors of Texas by observing fire restrictions, by using spark arresters on all power equipment and by not parking on road shoulders where a hot catalytic converter could ignite dry grass. Enjoy the hunt, but remember that one act of carelessness could ruin the day for everyone. This message is presented by the Texas Forest Service and K-Bay 92.5
