

# TEXAS TIMBER PRICE TRENDS

## Market Overview\*

Residential construction data for February 2016 was mostly positive. U.S. housing starts were at a seasonally adjusted annual rate of 1,178,000, which is 5.2 percent above the January estimate and 30.9 percent above the year ago estimate. Building permits were at a seasonally adjusted rate of 1,167,000, which is 3.1 percent below the January estimate, but 6.3 percent above year the ago estimate. A reporter noted that wooyards at most Texas mills remained full.

Statewide pine sawlog prices averaged \$29.87 per ton, slightly down from last period and up 1% from the price a year ago. Average pine sawlog price was \$29.05 per ton in North-east Texas and \$30.02 per ton in Southeast Texas.

The statewide average pine pulpwood price was \$8.66 per ton. This was down 1% from last period and down 10% from the price a year ago. In Northeast Texas, the average pine pulpwood price was \$8.88 per ton. It was \$8.58 per ton in Southeast Texas.

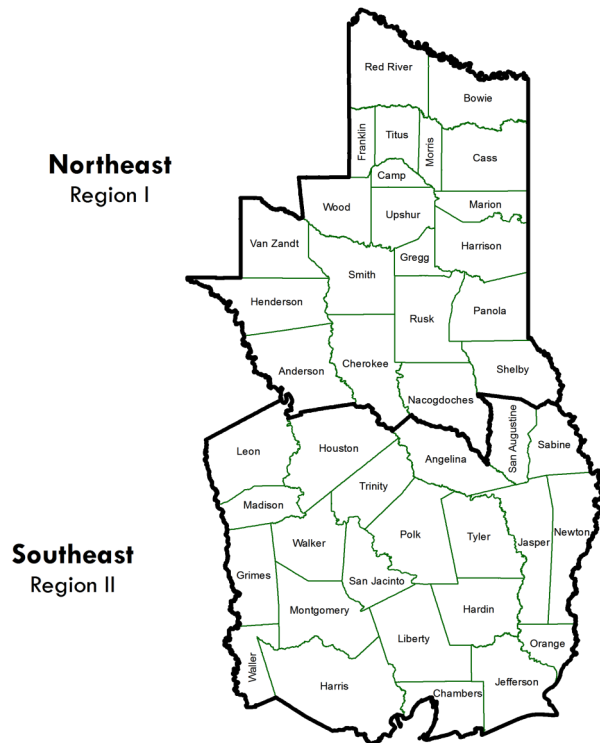

Small diameter pine sawlogs (CNS) averaged \$14.76 per ton statewide, up 11% from last period. It was down 12% from the price a year ago.

The statewide average mixed hardwood saw-log price was \$41.14 per ton, up 8% from last period and up 8% from the price a year ago.

The statewide average hardwood pulpwood price was \$11.71 per ton, 19% lower than last period. It was down 26% from the price a year ago.

\*The average prices reported here represent statewide volumes of 95,021 tons of pine sawlogs, 438,029 tons of pine pulpwood, 101,339 tons of pine CNS, 3,011 tons of mixed hardwood sawlogs, and 13,258 tons of hardwood pulpwood during January/February 2016.

1. Stumpage price statistics include gatewood sales. Stumpage prices for gatewood sales are estimated by subtracting cut-and-haul costs, other expenses, and profits provided by reporter.
2. Price is calculated from a specific conversion factor reported for each sale if available; otherwise, the average conversion factors listed on page 4 are used. MBF = Thousand Board Feet. The DOYLE LOG SCALE is used for board foot measurements.
3. Statewide data excludes U.S. Forest Service sales.
4. \*\* indicates insufficient sales to report price statistics (less than three sales).
5. Prices listed for previous periods may differ from previously published values because additional data have been received.
6. Price changes are calculated based on price in ton.
7. Extreme outliers from reported data are detected and filtered out based on statistical methods.

*Texas Timber Price Trends* is a bi-monthly publication reporting average prices paid for standing timber in Texas.

***This report is intended only as a guide to general price levels.*** Individuals inter-

ested in buying and selling timber can use this report to monitor market trends and get a general idea of what timber is worth. However, it should not be used to judge the fair market value of a specific timber sale, which may vary considerably due to many factors.

#### **HOW ARE AVERAGE PRICES CALCULATED?**

Data published in this report are from actual timber sales as reported by as many as 60 cooperators active in the East Texas timber market. Reporters include forest product companies, logging contractors, consulting foresters, family forest landowners, financial institutions, and federal agencies.

The prices are volume weighted average prices. The price per ton for each product category is as reported or using a specific conversion factor provided by the reporters. When a specific conversion factor for each sale is not available, an average conversion factor listed here is used instead.

#### **VOLUME CONVERSION FACTORS**

##### **Sawlogs & Chip-N-Saw**

Pine— 8 tons=1 MBF-Doyle

Pine CNS— 2.7 tons= 1 Cord

Hardwood— 9 tons= 1 MBF-Doyle

##### **Pulpwood**

Pine— 2.7 tons=1 Cord

Hardwood— 2.8 tons= 1 Cord

**This publication is also available on the Texas A&M Forest Service website at:**
