How to Plant Your Tree

texastreeplanting.com

- Cut roots that are circling the container.
- Top of rootball level with ground
- Protect trunk from weed trimmers with 2-liter plastic bottle.
- Flood partially backfilled hole with slow-running hose.
- Mulch 3" - 4" depth
- Keep mulch away from trunk.
- Backfill planting hole with original soil.
- Bottom of root ball on firm soil
- Planting hole 2 to 3 times wider than root ball diameter.
- Soil Ring
