

This appendix accompanies the report *Central & West Texas Forestlands, 2010* prepared by the Texas A&M Forest Service.

Figures:

- Figure A1—Total area of forestland by forest type and county, 2010.
- Figure A2—Percent of total area that is forestland by forest type and county, 2010.
- Figure A3—Total number of live trees by forest type and county, 2010.
- Figure A4—Average number of live trees per acre by forest type and county, 2010.
- Figure A5—Total volume by forest type and county, 2010.
- Figure A6—Average volume per acre by forest type and county, 2010.
- Figure A7—Total biomass by forest type and county, 2010.
- Figure A8—Average biomass per acre by forest type and county, 2010.

Tables:

- Table A1—Area, number, volume, and biomass of *all* forest types by county, 2010.
- Table A2—Area, number, volume, and biomass of *mesquite* forest types by county, 2010.
- Table A3—Area, number, volume, and biomass of *juniper-pine* forest types by county, 2010.
- Table A4—Area, number, volume, and biomass of *oak* forest types by county, 2010.
- Table A5—Area, number, volume, and biomass of *other hardwood* forest types by county, 2010.
- Table A6—Area, number, volume, and biomass of *nonstocked* forest types by county, 2010.

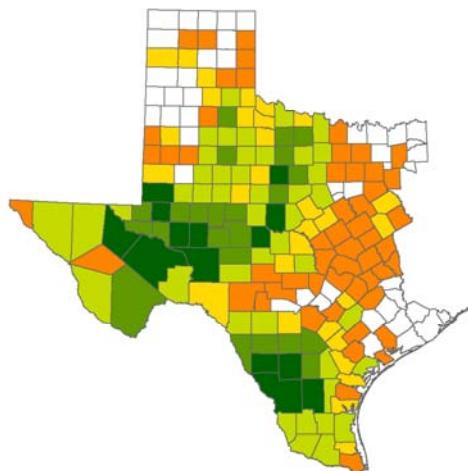

Definitions:

- Forestland—Land with at least 10 percent cover (or equivalent stocking) by live trees of any size, including land that formerly had such tree cover and that will be naturally or artificially regenerated.
- Number of all live trees (or trees)—Number of live trees at least 1 inch diameter at breast height or diameter at root collar.
- Volume of all live (or volume)—Net volume of wood in the central stem of live trees 5.0 inches diameter or larger from a 1 -foot height stump to a minimum 4-inch top diameter outside bark, or to where the central stem breaks into limbs all of which are less than 4.0 inches diameter outside bark. Specifications differ for woodland species.
- All live aboveground biomass (or biomass)—Aboveground dry weight of live trees 1.0 inches diameter or larger, including all tops and limbs, and stump, but excluding foliage.
- Per acre estimates in the appendix are per acre of forestland.

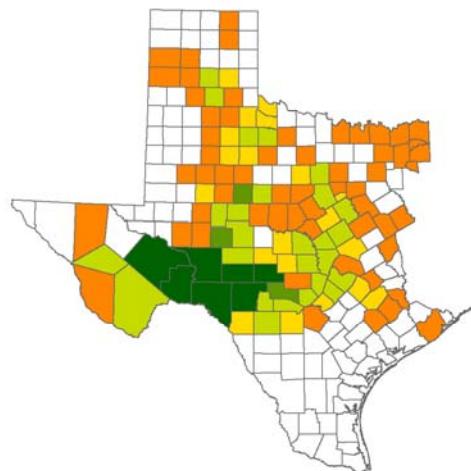

Notes:

- Estimates are given by county in the figures and tables. Estimates are based on a sample and are therefore subject to sampling error. Sampling errors may be high for individual counties.
- Inventory estimates are from custom queries of FIADB Version 5.1 Microsoft Access 2007 database that was loaded to the FIA DataMart (<http://apps.fs.fed.us/fiadb-downloads/datamart.html>) on 08-21-2012.

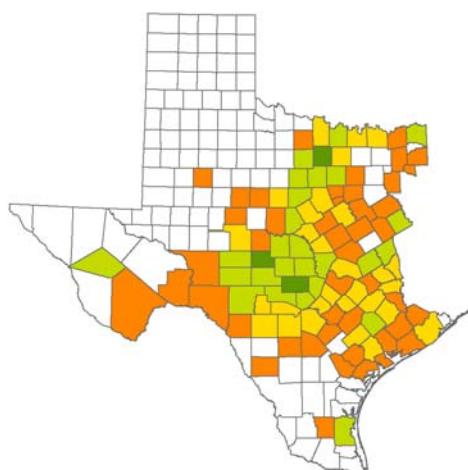

Mesquite forest types

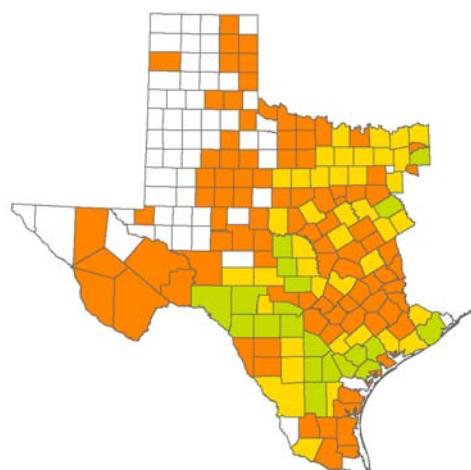

Juniper-pine forest types

Oak forest types

Other hardwood forest types

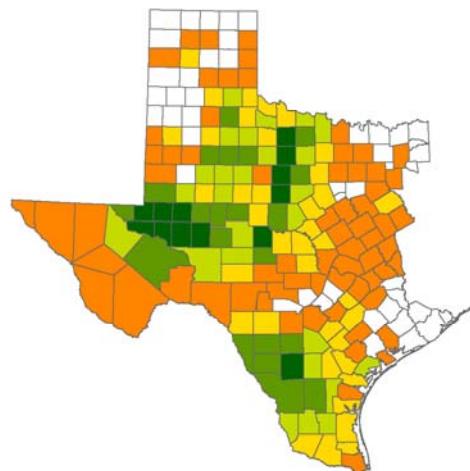

Thousands acres

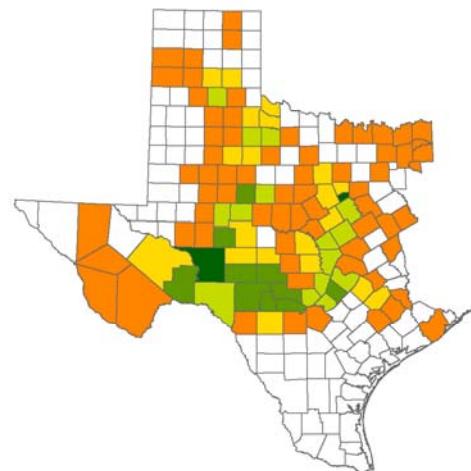

Figure A1. Total area of forestland by forest type and county, 2010.

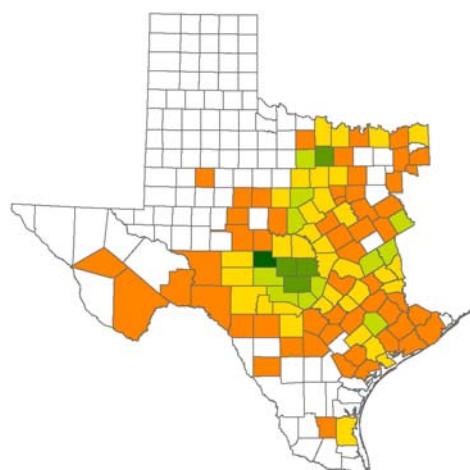

Mesquite forest types

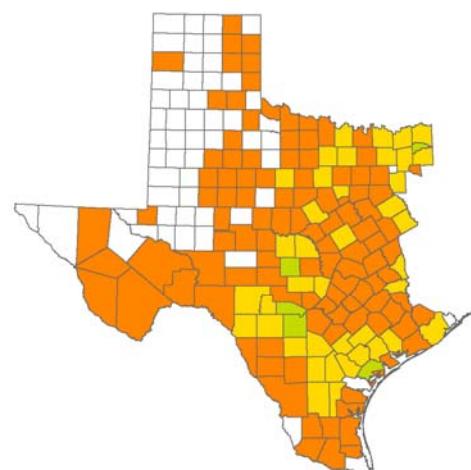

Juniper-pine forest types

Oak forest types

Other hardwood forest types

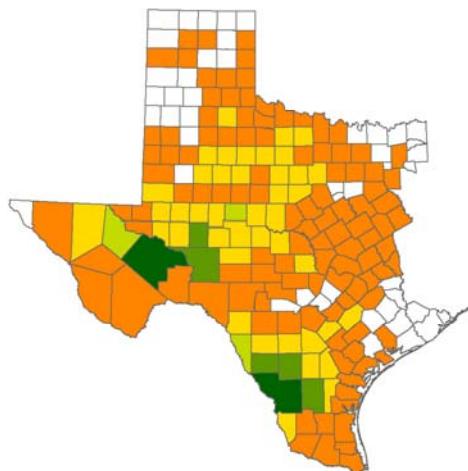

Percent

	None measured		11 to 20		31 to 40
	Up to 10		21 to 30		More than 40

^A Land with at least 10 percent cover by live trees of any size, including land that formerly had such tree cover and that will be naturally or artificially regenerated.

^B Number of live trees with a minimum diameter of 1 inch.

^C Net volume from a 1-foot high stump to a minimum 4-inch top diameter outside bark in trees with a minimum diameter of 5 inches.

^D Aboveground oven-dry weight of live trees with a minimum diameter of 1 inch.

Estimates in the table are based on a sample and are therefore subject to sampling error. Sampling errors may be high for some counties.

^A Land with at least 10 percent cover by live trees of any size, including land that formerly had such tree cover and that will be naturally or artificially regenerated.

^B Number of live trees with a minimum diameter of 1 inch.

^C Net volume from a 1-foot high stump to a minimum 4-inch top diameter outside bark in trees with a minimum diameter of 5 inches.

^D Aboveground oven-dry weight of live trees with a minimum diameter of 1 inch.

Estimates in the table are based on a sample and are therefore subject to sampling error. Sampling errors may be high for some counties.

^A Land with at least 10 percent cover by live trees of any size, including land that formerly had such tree cover and that will be naturally or artificially regenerated.

^B Number of live trees with a minimum diameter of 1 inch.

^C Net volume from a 1-foot high stump to a minimum 4-inch top diameter outside bark in trees with a minimum diameter of 5 inches.

^D Aboveground oven-dry weight of live trees with a minimum diameter of 1 inch.

Estimates in the table are based on a sample and are therefore subject to sampling error. Sampling errors may be high for some counties.

^A Land with at least 10 percent cover by live trees of any size, including land that formerly had such tree cover and that will be naturally or artificially regenerated.

^B Number of live trees with a minimum diameter of 1 inch.

^C Net volume from a 1-foot high stump to a minimum 4-inch top diameter outside bark in trees with a minimum diameter of 5 inches.

^D Aboveground oven-dry weight of live trees with a minimum diameter of 1 inch.

Estimates in the table are based on a sample and are therefore subject to sampling error. Sampling errors may be high for some counties.

^A Land with at least 10 percent cover by live trees of any size, including land that formerly had such tree cover and that will be naturally or artificially regenerated.

^B Number of live trees with a minimum diameter of 1 inch.

^C Net volume from a 1-foot high stump to a minimum 4-inch top diameter outside bark in trees with a minimum diameter of 5 inches.

^D Aboveground oven-dry weight of live trees with a minimum diameter of 1 inch.

Estimates in the table are based on a sample and are therefore subject to sampling error. Sampling errors may be high for some counties.

^A Land with at least 10 percent cover by live trees of any size, including land that formerly had such tree cover and that will be naturally or artificially regenerated.

^B Number of live trees with a minimum diameter of 1 inch.

^C Net volume from a 1-foot high stump to a minimum 4-inch top diameter outside bark in trees with a minimum diameter of 5 inches.

^D Aboveground oven-dry weight of live trees with a minimum diameter of 1 inch.

Estimates in the table are based on a sample and are therefore subject to sampling error. Sampling errors may be high for some counties.
